Coalition Communication
and the Expanding Influence of Social Media

Jonathan Lawson
Loyola University Chicago

A decorative header featuring a cluster of social media icons in hexagonal shapes. The icons include a red 'p' (Pinterest), a green '@' (Email), a red basketball (Sports), a blue 'in' (LinkedIn), a blue Twitter bird, a blue 'f' (Facebook), a yellow Wi-Fi symbol, a purple telephone handset, and an orange 'g+' (Google+). The background is a gradient of yellow and orange with a white wavy line.

Introduction

How does your organization already use social media?

- Which services do you use?
- How often do you post?
- What do you share with your audience?

What Exactly IS Social Media?

“Forms of electronic communication (as Web sites for social networking and microblogging) through which users create online communities to share information, ideas, personal messages, and other content (as videos).” – Merriam Webster

“Obviously, this isn’t going to work as a definition for us!”

What Exactly IS Social Media?

So, how about we find a definition that's actually useable?

“Social Media is the name we give to a set of platforms that allow you to broadcast yourself to the world.”

- Low barriers to entry
- Generally centered around communities with similar interests

What Exactly IS Social Media?

“Great. So, what are our options, then?”

We'll come back to this.

“What are our options?”

The Big Services

- Facebook
- Twitter
- Pinterest
- Instagram
- LinkedIn

Specialized Services

- Google+
- YouTube
- Snapchat
- Tumblr
- Dating Apps

A decorative graphic on the left side of the slide consists of a vertical column of yellow hexagons. Some hexagons contain white icons: a red hexagon with a white 'p' (Pinterest), a blue hexagon with a white envelope (Email), a green hexagon with a white '@' symbol, a blue hexagon with a white bird (Twitter), a blue hexagon with a white 'f' (Facebook), and an orange hexagon with a white 'g+' (Google+). To the right of this column, a red hexagon with a white basketball icon is positioned. The background of the slide is white.

“But which service should we use?”

- Don't stop at one!
- Different services have different user bases

What Exactly IS Social Media?

Before we can answer the question of what networks you need, we need to answer a few questions about the way you want to use it!

There are challenges connected to running a community organization

- Specialized audiences
- Specialized information
- Keeping up with emerging trends

Specialized Audiences

Every community is different, and therefore every community group is different and so are their audiences.

Whether it's the difference between New York and Denver or groups that work with African-Americans versus groups that work with Latinos, this dictates how a group uses their messaging.

Specialized Information

Drug prevention is complicated.
Community policing is complicated.
Lobbying is complicated.

Social media makes it easier to simplify
your communication and provide the
context that goes around your programs.

Specialized Information

In other words, Social Media can help you “Win the argument” and get that all-important community engagement.

And it can make that happen faster than ever before.

Keeping Up with Emerging Trends

Every community has different specific needs and different situations. This leads to different trends in different communities

It's also important to know not only where these trends come from, but where you – as a community group – are learning about them.

So that means the questions we need to answer are:

- Who is your audience?
- What specialized information do you need to communicate?
- What trends do you need to keep up with and where do you learn about them?

“But which service should we use?”

- Don't stop at one!
- Different services have different user bases
- **Key: *Finding a combination of SM that matches a user base with your client base***

The one we're all familiar with!

- 1.59 **Billion** active users worldwide
- 72% of adult U.S. internet users have an account
 - 82% of adults age 18-29
 - 79% of adults age 30-49
- 167 Million daily active users in the U.S.

Probably the 2nd most known social network on Earth.

- 302 Million active users worldwide
- Only 23% of adult U.S. internet users have an account
 - 25% of internet users who make \$50-75k per year
 - 28% of Black and 28% of Hispanic internet users
 - 20% of White internet users
- 80% of active users are on mobile

The video site owned by Google.

- Extremely great for conveying complex information
- A Billion users, according to YouTube
- More than half of YouTube views come from mobile devices
- YouTube mobile reaches more 18-49 year olds than any U.S. cable network

A decorative graphic on the left side of the slide consists of a vertical column of yellow hexagons. Some hexagons contain social media icons: a red hexagon with a white 'p' (Pinterest), a blue hexagon with a white envelope (Email), a green hexagon with a white '@' symbol, a blue hexagon with a white bird (Twitter), a blue hexagon with a white 'f' (Facebook), and an orange hexagon with a white 'g+' (Google+). To the right of this column is a single red hexagon with a white basketball icon. The background of the slide is white with a light blue shadow effect behind the text.

There are lots of other, more specialized sites to keep in mind as well.

- LinkedIn (Professional networking)
- Snapchat (Short, ephemeral messages)
- Google+ (Communities)
- Periscope (Live video streaming)

A decorative graphic on the left side of the slide consists of a vertical column of yellow hexagons. Some hexagons contain social media icons: a red hexagon with a white 'p' (Pinterest), a blue hexagon with a white envelope (Email), a green hexagon with a white '@' symbol, a blue hexagon with a white bird (Twitter), a blue hexagon with a white 'f' (Facebook), and an orange hexagon with a white 'g+' (Google+). To the right of this column, a red hexagon with a white basketball icon is positioned. The background of the slide is white with a yellow and grey geometric pattern on the left side.

“But which service should we use?”

- Don't stop at one!
- Different services have different user bases
- Key #1: Finding a combination of SM that matches a user base with your client base
- **Key #2: *Match the services you use with the message you want to put out into the world.***

Matching the Type of Message

Services

- Facebook
- Twitter
- YouTube
- Instagram
- LinkedIn
- Google+

Type of Message

- Announcements/Links
- Engagement/Links
- Videos
- Pictures/Engagement
- Professional Network
- Communities

A decorative graphic on the left side of the slide consists of a vertical column of yellow hexagons. Some hexagons contain social media icons: a red hexagon with a white 'p' (Pinterest), a blue hexagon with a white envelope (Email), a green hexagon with a white '@' symbol, a blue hexagon with a white bird (Twitter), a blue hexagon with a white 'f' (Facebook), and an orange hexagon with a white 'g+' (Google+). To the right of this column, a red hexagon with a white basketball icon is positioned. The background of the slide is white, and the text is in a blue, sans-serif font.

There are some services that are used more internationally than in the U.S.

- Weibo and QQ (China)
- Whatsapp (Worldwide)
- LINE (Japan)
- VK (Russia)
- Orkut (Brazil)

“Advanced Concepts”

- Deciding what services should have what information on them
- Recognizing where engagement matters and where it doesn't
- Recognizing WHAT engagement matters and what doesn't
- How timing your posts can ensure your message reaches the right people

What information are you pushing out?

Type of Message

- Announcements/Links
- Engagement/Links
- Videos
- Pictures/Engagement
- Professional Network
- Communities

Services

- Facebook
- Twitter
- YouTube
- Instagram
- LinkedIn
- Google+

“What exactly is ‘Engagement’?”

- “Engagement” is simple: Anytime someone interacts with your post. Be it clicking the link, responding in a comment, or saving it to read and share later.
- Engagement is the goal, but remember that not all engagement is the same!

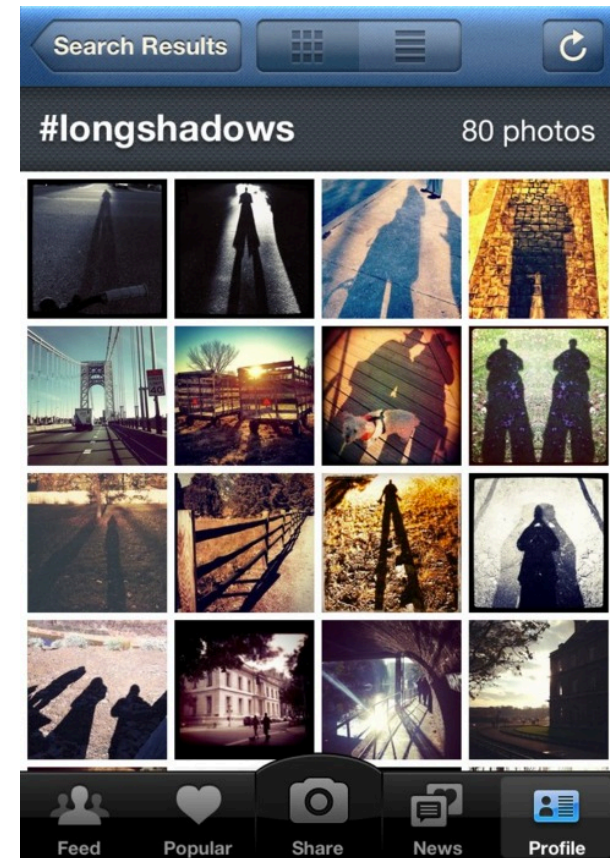

Engagement

- Clickthroughs matter for links and pictures or infographics, but they matter a lot less for short messages like date reminders.
- Comments/replies might be important or might not.

Tags and Organization

- Tags (Hashtags) are used to organize content
- Connect yourself to a discussion or help people find your posts

“Do we *need* to deal with these analytics?”

No! But, you *can* harness these analytic tools to make sure your message gets out to the right audience at the right time. This can make a huge difference in engagement!
